FASTENER FAIR ITALY BRINGS FORWARD THE DATES OF ITS 5TH EDITION: SEE YOU IN MILAN ON 24–25 JUNE 2026

A strategic opportunity to foster networking, innovation, and business development in the fastener and fixing market

Milan, 8 July 2025 – **Fastener Fair Italy**, the leading trade event in Italy for the fastener and fixing industry, **has announced new dates for its 5th edition**: the show will take place on **24 - 25 June 2026 at CityLife – Allianz MiCo in Milan**, instead of the previously scheduled 6 - 7 October.

The decision responds to **strong demand from international exhibitors and key industry stakeholders**, aiming to align the show with a more favourable trade fair calendar for the European market. Moving the event to the first half of the year is a strategic choice to facilitate logistics planning, improve the visitor experience, and create new business opportunities ahead of the summer break.

Consistent growth

This decision was also supported by the **positive and growing trend** of previous editions: the most recent event hosted **over 200 exhibitors** from **19 countries** and attracted **more than 2,400 industry-specific visitors** from across Europe. The event featured intense networking activity and product showcases, and received extremely positive feedback from participating companies, who reaffirmed its importance as a key platform for the fastener and fixing industry.

"The success of the last edition and the increasing interest from the market led us to bring forward the dates of the next edition, with the aim of making the event even more strategic and commercially effective," said Stephanie Cerri, Event Director at RX "The first half of the year slot allows us to tap into an ideal window to promote long-term business relationships and the launch of new products. Thanks to a targeted networking programme, visitors will be able to explore the most innovative solutions in the industry and gain valuable insight into the latest technologies presented by the sector's leading players".

The fastener market plays a **vital role** across a wide range of industries – including automotive, aerospace, manufacturing, and construction – and continues to grow in Italy. This is driven in part by the internationalisation of markets, which presents significant opportunities for **commercial expansion** throughout the sector.

Looking ahead to the 2026 edition

The upcoming edition of Fastener Fair Italy will introduce a range of **new features** designed to deliver an even more complete and forward-looking industry experience. These include new themed areas dedicated to **innovation, sustainability, and hand tools**, an expanded showcase for precision turned parts manufacturers, and economic support initiatives for businesses.

The exhibition also aims to **increase international participation**, attract **new exhibitors** from key markets, and enhance visitor quality, with a strong focus on distributors, buyers, and technical decision-makers. A rich programme of **networking opportunities, educational content, and technical sessions** will further enhance the on-site experience.
